The main reason for the efficiency of adver i oments lies in their buth. The FARMERS AND MECHANIES has expended more money among the cournals of this State than many storescopers possess as a working capital. It still continues to add thousands of soi are to its expense account or adver sing. Every business is conducted to make money. No chant sells goods at a loss, nuless he has paid too much them, or hopes by selling some things at a loss to nell other goods at a large profit. A glance at any of the newspap of the day will show how far these chameful methods are resorted to. "Sweeping Reductions," "Selling Relow Cost," "Goods at 81 per yard, worth \$1 50." What else do such things mean but fraud ? Such dealers simply thrive on the credulity of the public. But happily there are other business methods in vogue. There are merchants who sell low by seeling much. People who have ready cash, and are thus free to trade where they will find this cut and deal with such morehants more and me In time a great trade spr ugs up as strong and entering Gibraliar itself, because broadly founded on the local seated convictions of the Jublic.

> The larger such a business grows the more independent it is. It diegets the best goods the very ere of the market. On the other hi It has the power of pretecting it tomers by selling to gray one at the same prices; by allowing credit to as one, and by sutting the coffing and in plain figures on every article.
